

Osprey Funds Continues Streak of Leading-Edge Product Launches with Opening of Solana Fund

The Osprey Solana Fund is the first investment product in the US to invest exclusively in SOL

TARRYTOWN, N.Y. — September 9, 2021 — [Osprey Funds, LLC](#), a premier digital asset management firm, today announced the launch of the [Osprey Solana Trust](#) for private placement. The Trust is the first investment vehicle to offer exposure to SOL, the native token used on the [Solana blockchain](#), the fastest blockchain in the world.

Following a breakthrough in mobile communications, Solana Founder and CEO Anatoly Yakovenko introduced Proof of History to blockchain, an algorithmic solution for timestamping transactions. This enables the Solana network to operate at incredible speed, processing 65,000 transactions per second with sub-second block finality, which will only get faster as network bandwidth increases.

“The pedigree of the science and potential of the technology behind Solana is unique among current blockchains,” said Greg King, CEO of Osprey Funds. “Solana has the potential to become the rails of an integrated, decentralized financial network that establishes one global price for assets. With the debut of the Osprey Solana Trust, we are continuing to build onramps for investors to access what we believe are the most promising blockchain technologies.”

The Osprey Solana Trust is currently available to accredited investors for subscription with a \$10,000 minimum investment. The sponsor intends to pursue listing the fund on the OTCQX market as soon as possible and has also agreed to waive the management fee for all investors until January 2023.

Osprey Funds continues to deepen its disruptive digital asset investment platform with the Osprey Solana Trust being the fourth product launched this year. The firm also offers the [Osprey Bitcoin Trust \(OBTC\)](#), the [Osprey Polkadot Trust](#) and the [Osprey Algorand Trust](#).
